

Calculate Result Using Localhost Web Application

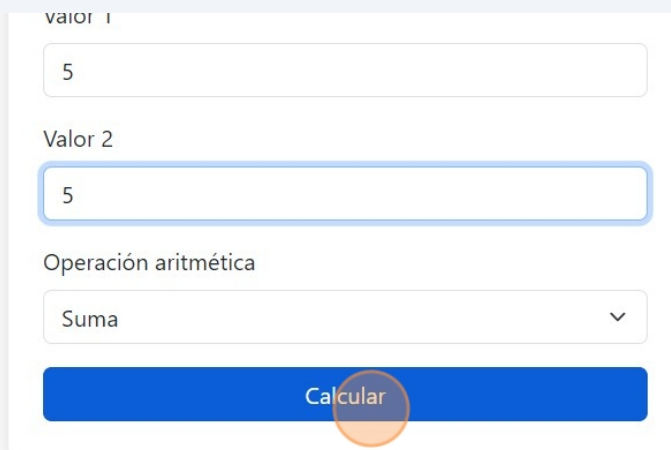

1 Navegación inicial local <http://localhost:51204/>

2 Ingreso de primer valor y segundo valor

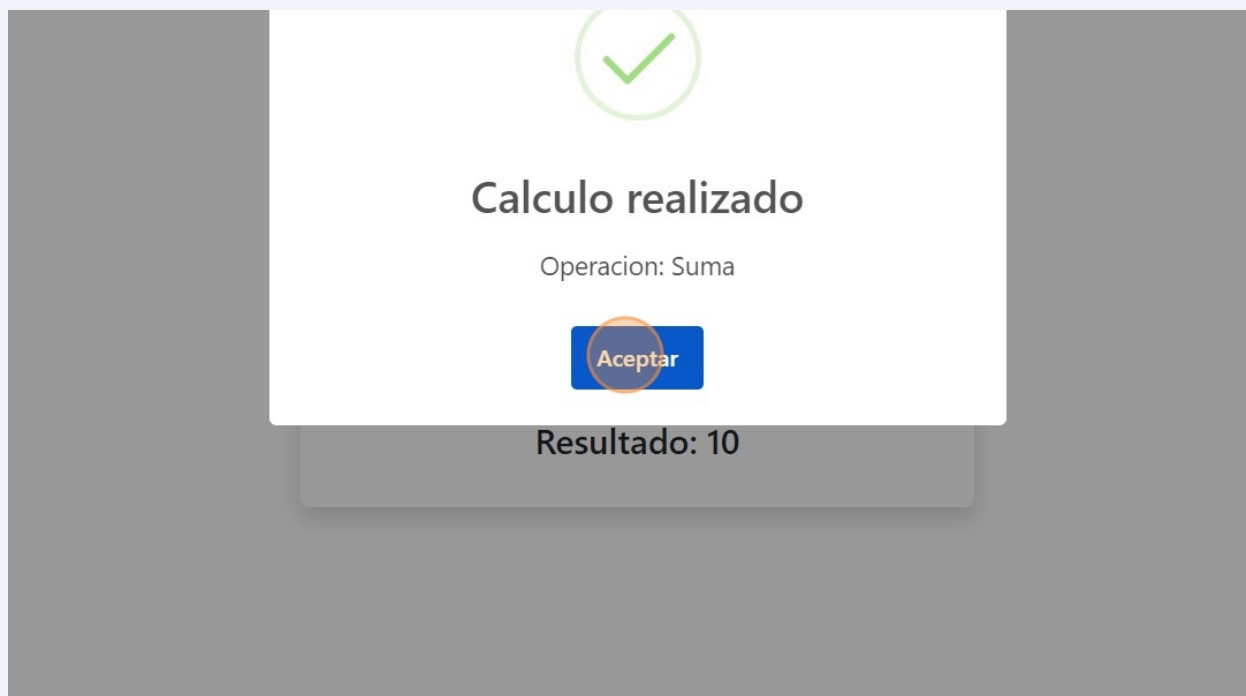

The screenshot shows a web application titled "Calculadora Aritmética" (Arithmetic Calculator). It features three input fields and a dropdown menu. The first input field is labeled "Valor 1" and contains the placeholder text "Ingrese el primer valor". The second input field is labeled "Valor 2" and contains the placeholder text "Ingrese el segundo valor". The third input field is a dropdown menu labeled "Operación aritmética" with the selected option "Suma". Below these fields is a blue button labeled "Calcular". An orange circle highlights the first input field.

3 Click "Calcular"

A screenshot of a web form for calculations. It contains three input fields: 'valor 1' with the value '5', 'Valor 2' with the value '5', and a dropdown menu for 'Operación aritmética' set to 'Suma'. A blue button labeled 'Calcular' is at the bottom, with an orange circle highlighting it to indicate a click action.

4 Mensaje de operación realizada - Click "Aceptar"

A screenshot of a confirmation message dialog box. At the top is a green checkmark icon. Below it, the text reads 'Calculo realizado', 'Operacion: Suma', and 'Resultado: 10'. A blue button labeled 'Aceptar' is centered at the bottom, with an orange circle highlighting it to indicate a click action.
